ELSEVIER

Comput. Methods Appl. Mech. Engrg. 122 (1995) 403–404

Computer methods in applied mechanics and engineering

Contents Volume 122

Volume 122, Nos. 1–2, April 1995

Alternative integration methods for problems in structural dynamics
B. Owren and H.H. Simonsen 1

On finite element implementation of geometrically nonlinear Reissner's beam theory: three-dimensional curved beam elements
A. Ibrahimbegović 11

A computational method for design senstivity analysis of elastoplastic structures
T.H. Lee and J.S. Arora 27

The incremental flow formulation for the numerical analysis of 3-dimensional viscous deformation processes: continuum formulation and computational aspects
J. Bonet and P. Bhargava 51

A numerical procedure for the determination of certain quantities related to the stress intensity factors in two-dimensional elasticity
P.J. Papadakis and I. Babuska 69

Interpolation methods for the construction of shape function space of nonconforming finite elements
J. Gao and T.M. Shih 93

A modified generalized midpoint rule for the integration of rate-dependent thermo-elastic-plastic constitutive equations
P.A. Fotiu 105

CFD predictions of lobed mixer performance
P. Koutmos and J.J. McGuirk 131

A mathematical framework for finite strain elastoplastic consolidation. Part 1: Balance laws, variational formulation, and linearization
R.I. Borja and E. Alarcón 145

Use of a spreadsheet program in a two-dimensional heat conduction problem
A. Kharab 173

Dual analysis with general boundary conditions
J.F. Debongnie, H.G. Zhong and P. Beckers 183

Genetic search methods for assessing geometric tolerances
L.C.R. Carpinetti and D.G. Chetwynd 193

Volume 122, Nos. 3–4, May 1995

Variational principles, FE and MPT for analysis of nonlinear impact–contact problems
Q.H. Qin and X.Q. He 205

Eulerian–Lagrangian localized adjoint methods for a nonlinear advection–diffusion equation
H.K. Dahle, R.E. Ewing and T.F. Russell 223

Unit-impulse response matrix of unbounded medium by infinitesimal finite-element cell method
J.P. Wolf and C. Song 251

η%-Superconvergence of finite element approximations in the interior of general meshes of triangles
I. Babuška, T. Strouboulis and C.S. Upadhyay 273

Some geometrical results and estimates for quadrilateral finite elements
K. Arunakirinathar and B.D. Reddy 307

A group theoretic approach to the global bifurcation analysis of an axially compressed cylindrical shell
J.C. Wohlever and T.J. Healey 315

Nonlinear and chaotic oscillations of composite plates and shells under periodic heat load
J.H. Argyris and L. Tenek 351

Hybrid-Trefftz finite element method for Reissner plates on an elastic foundation
W.H. Qin 379
